

Ethyl diglycol

Technical DataSheet | Supplied by Oxiteno

Diethylene glycol ethyl ether. Acts as a solvent. It results from the reaction of ethylene oxide and ethyl glycol. Used in printing ink, wood paint, automotive finish/refinish and construction paint applications.

Product Type	Solvents > Glycols & Glycol Ethers
Chemical Composition	Diethylene glycol ethyl ether
CAS Number	111-90-0
Physical Form	Liquid
Appearance	Clear
Product Status	COMMERCIAL
Geographical Availability	Central and Eastern Europe, North America, South and Central America, Western Europe
Applications/ Recommended for	Coatings Inks Inks > Varnishes / Over print varnish Coatings Markets > Automotive refinishing Coatings Markets > Wood & Furniture Coatings Construction paint

Ethyl diglycol Properties

Property	Value & Unit	Test Condition	Test Method
Color, APHA	< 10		
Specific Gravity	0.989 - 0.993	At 20/20°C	
Water Content	< 0.1 %		
Acid Value	< 100 ppm	As Acetic Acid	
Boiling Point	202.7 °C		
Evaporation Rate (n-BuAc=100)	< 1		
Vapor Pressure	0.17 hPa		
Flash Point	91 °C
