

2-Ethyl hexanol

Technical DataSheet | Supplied by Mitsubishi Chemical

2-Ethyl hexanol by Mitsubishi Chemical is a polyol monomer with 8-carbon higher alcohol species. 2-Ethyl hexanol has very low-level of impurities and may be used as a raw materials for a wide variety of chemicals.

Product Type	Polyols
CAS Number	104-76-7
Physical Form	Liquid
Appearance	Clear, Colorless
Product Status	COMMERCIAL
Labels/Agency Rating	EINECS

2-Ethyl hexanol Properties

Property	Value & Unit	Test Condition	Test Method
Boiling point, (101.3kPa)	184.6 °C		
Molecular weight	130.2		

Solubility	Element	Test Condition	Test Method
hardly soluble	water		
Soluble in	organic solvent
