

Benzyl Alcohol

Technical DataSheet | Supplied by Keeneyes Industrial

Benzyl alcohol. Acts as a diluent. It is an aromatic alcohol having minimal effect on viscosity. Reduces the solid content in applied coating formulations. Used as a raw material for paints.

Chemical Composition	Benzyl alcohol
CAS Number	100-51-6
Product Status	COMMERCIAL

Benzyl Alcohol Properties

Property	Value & Unit	Test Condition	Test Method
Boiling Point	205 °C		
Flash Point	96 - 101 °C	Closed Cup	
Vapor Pressure	0.07 hPa	At 20°C	
Evaporation Rate (n-BuAc=100)	0.7
